Statistical Commission
Forty-second session
22-25 February 2011
Item 2 of the provisional agenda
Adoption of the agenda and other organizational matters

Provisional agenda and annotations

1. Election of officers.
2. Adoption of the agenda and other organizational matters.
3. Items for discussion and decision:
   (a) World Statistics Day;
   (b) Programme review: gender statistics;
   (c) National accounts;
   (d) Environmental-economic accounting;
   (e) Energy statistics;
   (f) Integrated economic statistics;
   (g) Short-term economic indicators;
   (h) International Comparison Programme;
   (i) Development indicators;
   (j) Statistics of human development;
   (k) Implementation of the Fundamental Principles of Official Statistics;
   (l) Statistical capacity-building;
   (m) Regional statistical development in Western Asia.
4. Items for information:
   (a) Population and housing censuses;
   (b) Health statistics;
   (c) Education statistics;

10-63748 (E) 101210

(d) Agricultural statistics;

(e) Business registers;

(f) Tourism statistics;

(g) Price statistics;

(h) Environment statistics;

(i) Coordination and integration of statistical programmes;

(j) Inventory of global statistical standards;

(k) Common open standards for the exchange and sharing of data and metadata;

(l) Follow-up to Economic and Social Council policy decisions;

(m) National quality assurance frameworks;

(n) Global geospatial information management;

(o) Measurement of economic performance and social progress.

5. Programme questions (United Nations Statistics Division).

6. Provisional agenda and dates for the forty-third session of the Commission.

7. Report of the Commission on its forty-second session.

Annotations

1. Election of officers

In accordance with rule 15 of the rules of procedure of the functional commissions of the Economic and Social Council and past practices, the Statistical Commission, at the commencement of its first meeting of a regular session, shall elect, from among the representatives of its members, a Chair, three Vice-Chairs and a Rapporteur (the Bureau).

The Bureau serves for two years, to the extent possible. This is achieved by electing the Bureau for a period of one year and re-electing those members of the Bureau who continue to be representatives to the Commission at the following session. The Bureau is elected based on the principle of equitable geographical distribution; a member of the Bureau is elected from each of the regions represented on the Commission.

2. Adoption of the agenda and other organizational matters

The items on the provisional agenda and the corresponding documentation were proposed by the Commission at its forty-first session (New York, 23-26 February 2010)[1] and were adopted by the Economic and Social Council in its decision 2010/235. The Bureau of the Commission has subsequently approved some changes. The proposed draft organization of work and a note on the state of preparation of

[1] See *Official Records of the Economic and Social Council, 2010, Supplement No. 4* (E/2010/24), chap. I, sect. B, draft decision.

documentation for the session are before the Commission. The Commission may wish to adopt the agenda and organization of work for its forty-second session.

Documentation

Provisional agenda and annotations (E/CN.3/2011/1)

Note by the Secretariat on the organization of the work of the session (E/CN.3/2011/L.1)

Note by the Secretariat on the state of preparation of documentation for the session (E/CN.3/2011/CRP.1)

3. Items for discussion and decision

(a) World Statistics Day

The Commission will have before it a report of the Secretary-General describing the activities undertaken by the statistical community to mark the first World Statistics Day, held on 20 October 2010, which celebrated the many achievements of official statistics and the core values of service, integrity and professionalism.

The Commission is invited to comment on the relevance and effectiveness of the activities and the proposed options for future celebrations of World Statistics Day.

Documentation

Report of the Secretary-General on World Statistics Day (E/CN.3/2011/2)

(b) Programme review: gender statistics

The Commission will have before it the report of the Ghana Statistical Service containing a programme review on gender statistics. Although the production of gender statistics has evolved over the past three and a half decades, advancements in this area have varied widely across regions and countries. The review takes stock of the achievements made in gender statistics, and assesses how national statistical systems and the international community have responded to the growing demand for gender statistics. The Commission is invited to consider ways of consolidating the often fragmented achievements and bringing coherence to this burgeoning field of statistics, drawing on both national and international experiences, and guiding national statistical offices in advancing the field.

The Commission will also have before it, for information, the report of the Secretary-General on the Global Gender Statistics Programme, which will include an account of three meetings of the Global Forum on Gender Statistics in terms of progress made and activities that are under way. It also elaborates on the production and release of *The World's Women 2010: Trends and Statistics*. The Commission may wish to take note of the report.

The Commission will have before it, for information, the report of the Friends of the Chair on the review of indicators on violence against women. The report presents the major conclusions of the meeting of the Friends of the Chair held in December 2009 in Aguascalientes, Mexico, and the proposal for the forthcoming work of the Friends of the Chair. It will be supported by the full report of the meeting presented as a background document. The Commission may wish to take note of the report.

Report of the Secretary-General on the Global Gender Statistics Programme (E/CN.3/2011/4)

Note by the Secretary-General transmitting the report of the Friends of the Chair on the review of indicators on violence against women (E/CN.3/2011/5)

(c) National accounts

The Commission will have before it the report of the Intersecretariat Working Group on National Accounts. The report provides an update on the publication and translation of the *System of National Accounts, 2008* (2008 SNA). The report also presents the Group's research agenda and its mandate and governance. In addition, the report provides information on the global implementation programme for the 2008 SNA and supporting statistics. The Commission is requested to express its views and provide guidance on the elements of the programme of work of the Group.

Documentation

Note by the Secretary-General transmitting the report of the Intersecretariat Working Group on National Accounts (E/CN.3/2011/6)

(d) Environmental-economic accounting

The Commission will have before it the report of the Committee of Experts on Environmental-Economic Accounting. The report describes progress made in the programme of work of the Committee, with particular focus on activities related to the revision of the System of Integrated Environmental and Economic Accounting 2003. The outcome of the fifth meeting of the Committee will also be included in the report. The recommendations on the issue list for volume 1 of the revised System will be submitted to the Commission as a separate background document. The Commission is requested to review and endorse the recommendations on the issues of volume 1 of the revised System and to express its views on the progress made by the Committee in its work.

Documentation

Note by the Secretary-General transmitting the report of the Committee of Experts on Environmental-Economic Accounting (E/CN.3/2011/7)

(e) Energy statistics

The Commission will have before it the report of the Secretary-General containing a proposal to adopt the international recommendations on energy statistics and describing the work carried out for their development, as well as other activities in the field of energy statistics. The recommendations were developed in accordance with the decisions of the Commission at its fortieth session, wherein the Commission suggested that the preparation of the recommendations be considered a matter of high priority. The Commission is invited to review and adopt the

recommendations and to express its views on the actions taken and proposed activities in the field of energy statistics.

The Commission will also have before it, for information, the report of the Oslo Group on Energy Statistics. The report contains a description of the Group's activities in 2009-2010, including summaries of its fourth and fifth meetings and its future workplan. The Commission may wish to take note of the report.

Documentation

Report of the Secretary-General on energy statistics (E/CN.3/2011/8)

Note by the Secretary-General transmitting the report of the Oslo Group on Energy Statistics (E/CN.3/2011/9)

(f) Integrated economic statistics

The Commission will have before it the report of the Friends of the Chair on integrated economic statistics. The report describes the Guidelines on the principles and practices of integrated economic statistics prepared at the request of the Statistical Commission at its thirty-ninth session. The Commission is requested to express its views on the Guidelines.

Documentation

Note by the Secretary-General transmitting the report of the Friends of the Chair on integrated economic statistics (E/CN.3/2011/10)

(g) Short-term economic indicators

The Commission will have before it the report of the Secretary-General on short-term economic indicators. The report sets out the recommendations for the monitoring of business cycles and early identification of turning points, as well as strategies for future work on improving statistical manuals and tools for this purpose. The Commission is requested to express its views and provide guidance on the recommendations for future work on short-term economic statistics.

Documentation

Report of the Secretary-General on short-term economic indicators (E/CN.3/2011/11)

(h) International Comparison Programme

The Commission will have before it the report of the World Bank on the International Comparison Programme. The report prepared by the World Bank on behalf of the Executive Board of the International Comparison Programme outlines the status of implementation of the 2011 round. The report describes the status of country participation and other governance aspects, the operational aspects undertaken in preparation for the 2011 data-collection and compilation activities, the status of progress at the regional and country levels, as well as the overall workplan. The Commission may wish to review the progress with respect to implementation of the 2011 round and to express its views on the workplan.

Documentation

Note by the Secretary-General transmitting the report of the World Bank on the International Comparison Programme (E/CN.3/2011/12)

(i) Development indicators

The Commission will have before it a report of the Secretary-General describing the work of the Inter-agency and Expert Group on Millennium Development Goal Indicators and the Statistics Division in the following areas: improving methods for the monitoring of the Millennium Development Goals; resolving differences between national and international data sets; reviewing strategies to increase capacity-building efforts for the monitoring of the Millennium Development Goals; and defining strategies to assist countries in improving coordination of data reporting and monitoring of the Millennium Development Goals. The report also describes the preparation of the yearly progress reports on progress towards achievement of the Millennium Development Goals and presents an assessment of data availability for Millennium Development Goal indicators. The Commission is invited to comment on the progress made by the Inter-agency and Expert Group on Millennium Development Goal Indicators and its future direction of work.

Documentation

Report of the Secretary-General on development indicators (E/CN.3/2011/13)

(j) Statistics of human development

The Commission will have before it the report of the Bureau of the Statistical Commission on statistics of human development. This report informs the Commission, as requested at its forty-first session, about the consultation process with the Human Development Report Office that has taken place over the past months. In particular, it relates the findings and recommendations of an expert group meeting that took place in March 2010. The Bureau report concludes with a recommendation that the Commission assess the methodological soundness and appropriateness of the data used for the Human Development Report, based on the three reports on this topic, which will be before the Commission.

The Commission will also have before it the report of the United Nations Development Programme on statistics of human development. This report, prepared by the Human Development Report Office, outlines the changes in methodology introduced in the 2010 Human Development Report, which marked the twentieth anniversary of measuring human development. The report will review the innovations, their rationale and the benefits and weaknesses of the new methodologies. The Commission may wish to review the complementary new indices, related to inequality and poverty, as well as future plans. An update on the status of preparations for the 2011 Human Development Report will be included in the report.

The Commission will also have before it the report of Brazil, Morocco and South Africa on concerns about indicators released by United Nations agencies. This report summarizes the recent debate on Member States' concerns about country-level statistical indicators released by international organizations or their country representatives. The document focuses on concerns about the choice of indicators

and their methodology on the one hand and concerns about the choice and use of source data on the other hand, and provides concrete examples for discrepancies and problems that can arise from such discrepancies.

Note by the Secretary-General transmitting the report of Brazil, Morocco and South Africa on concerns about indicators released by United Nations agencies (E/CN.3/2011/16)

(k) Implementation of the Fundamental Principles of Official Statistics

The Commission will have before it the report of the Secretary-General on the implementation of the Fundamental Principles of Official Statistics. This report provides an overview of the implementation of the Fundamental Principles of Official Statistics, which were adopted by the Statistical Commission in 1994. Building on the 2004 global review, the report assesses recent developments and challenges to the implementation of these Fundamental Principles and seeks guidance from the Commission on how to better implement them.

Documentation

Report of the Secretary-General on the implementation of the Fundamental Principles of Official Statistics (E/CN.3/2011/17)

(l) Statistical capacity-building

The Commission will have before it the report of the Secretary-General on statistical capacity-building. This report provides an overview of the work undertaken by the Statistics Division to support national efforts in building and strengthening national statistical capacity. In particular, work is described within the frameworks of the 2010 World Programme on Population and Housing Censuses, the project to improve the collation, availability and dissemination of Millennium Development Goal data, the development accounts of the Department of Economic and Social Affairs and the Statistics Division's regular programme of technical cooperation. The Commission is invited to share its views on the Division's capacity-building programme.

The Commission will also have before it, for information, a report prepared by the Partnership in Statistics for Development in the 21st Century. The report outlines efforts to promote the use of better statistics as a central part of the enabling environment for development progress, particularly through support to countries in the design, implementation and monitoring of national strategies for the development of statistics, through advocacy and by encouraging donor collaboration in statistical support programmes. The Commission may wish to take note of the report.

Note by the Secretary-General transmitting the report of the Partnership in Statistics for Development in the 21st Century (E/CN.3/2011/19)

(m) Regional statistical development in Western Asia

The Commission will have before it a report on regional statistical development in member countries of the Economic and Social Commission for Western Asia. The report summarizes the challenges and priorities of official statistics in the region in general and with respect to particular subject-matter areas. The report further discusses challenges of regional coordination of statistical activities. One of the main issues addressed is the consistency of data published by national statistical offices and data published by international organizations. An overview assessment of the implementation of the Fundamental Principles of Official Statistics is also included in the paper. The Commission is invited to comment on the proposals for the way forward.

Documentation

Note by the Secretary-General transmitting the report of the Economic and Social Commission for Western Asia on regional statistical development in Western Asia (E/CN.3/2011/20)

4. Items for information

(a) Population and housing censuses

The Commission will have before it the report of the Secretary-General on population and housing censuses. The report contains a description of activities undertaken in response to the recommendation made by the Statistical Commission at its thirty-eighth session in regard to the implementation of the 2010 World Programme on Population and Housing Censuses. The activities include the conduct of seminars and training workshops; dissemination of the *Principles and Recommendations for Population and Housing Censuses, Revision 2* and supplement handbooks and technical reports; upgrading and dissemination of the software package, "CensusInfo", to help countries disseminate census data; as well as maintaining a census resource centre. The Commission may wish to take note of the report.

Documentation

Report of the Secretary-General on population and housing censuses (E/CN.3/2011/21)

(b) Health statistics

The Commission will have before it the report of the Intersecretariat Working Group on Health Statistics. The report provides a description of activities as a follow-up to the report submitted to the Statistical Commission at its thirty-eighth session. The report focuses on the activities accomplished to date, the future programme of work and governance issues such as membership of the Group and the schedule of meetings. The Commission may wish to take note of the report.

Documentation

Note by the Secretary-General transmitting the report of the Intersecretariat Working Group on Heath Statistics (E/CN.3/2011/22)

(c) Education statistics

The Commission will have before it the report of the United Nations Educational, Scientific and Cultural Organization on education statistics. The report provides information regarding the establishment and mandate of an intersecretariat working group on education statistics to improve coordination and maintain international standards. The report also includes updated information on global consultations on the proposed revisions to the International Standard Classification of Education and the process for its adoption by the General Conference of the United Nations Educational, Scientific and Cultural Organization in October 2011. The Commission may wish to take note of the report.

Documentation

Note by the Secretary-General transmitting the report of the United Nations Educational, Scientific and Cultural Organization on education statistics (E/CN.3/2011/23)

(d) Agricultural statistics

The Commission will have before it the report of the Friends of the Chair on agricultural statistics presenting the progress made in the development of the implementation plan of the Global Strategy to Improve Agricultural and Rural Statistics, endorsed by the Commission at its forty-first session. The implementation plan adopts a regional approach to take account of the different level of statistical development between regions as well as to ensure ownership by regional institutions. A comprehensive technical assistance programme, an articulated training programme and a targeted research agenda have been developed. A governance framework with coordinating structures at the global, regional and national levels is also proposed and the plan outlines a comprehensive strategy for the mobilization of resources and technical support from developed countries, the donor community and international organizations that provide technical assistance. The implementation plan also provides the framework for the country assessment that will be used as a basis to begin the implementation at the national level. The Commission may wish to take note of the report.

Documentation

Note by the Secretary-General transmitting the report of the Friends of the Chair on agricultural statistics (E/CN.3/2011/24)

(e) Business registers

The Commission will have before it the report of the Wiesbaden Group on Business Registers summarizing recent developments and planned activities of the Wiesbaden Group. The Commission may wish to take note of the report.

Documentation

Note by the Secretary-General transmitting the report of the Wiesbaden Group on Business Registers (E/CN.3/2011/25)

(f) Tourism statistics

The Commission will have before it the report of the World Tourism Organization summarizing the activities it has carried out in response to the decisions taken by the Commission at its thirty-ninth session in the area of tourism statistics. In particular, the report provides an overview of the work undertaken by the World Tourism Organization in cooperation with other international organizations to develop a compilation guide for the International Recommendations on Tourism Statistics 2008. The Commission may wish to take note of the report.

Documentation

Note by the Secretary-General transmitting the report of the World Tourism Organization on tourism statistics (E/CN.3/2011/26)

(g) Price statistics

The Commission will have before it the report of the Intersecretariat Working Group on Price Statistics summarizing recent developments and planned activities. The Commission may wish to take note of the report.

Documentation

Note by the Secretary-General transmitting the report of the Intersecretariat Working Group on Price Statistics (E/CN.3/2011/27)

(h) Environment statistics

The Commission will have before it the report of the Secretary-General on the Framework for the Development of Environment Statistics. The Statistical Commission at its forty-first session had endorsed the programme of work for the revision of *A Framework for the Development of Environment Statistics* (United Nations, 1984). The report summarizes progress made in the revision process, including the establishment of the Expert Group on the Revision of the United Nations Framework for the Development of Environment Statistics and the main results of the first meeting of the Expert Group, and presents a detailed timetable with outputs and responsibilities for 2011. The Commission may wish to take note of the report.

Documentation

Report of the Secretary-General on the Framework for the Development of Environment Statistics (E/CN.3/2011/28)

(i) Coordination and integration of statistical programmes

The Commission will have before it a report that summarizes the main conclusions of the fifteenth and sixteenth sessions of the Committee for the Coordination of Statistical Activities, held in New York on 22 February 2010 and in Vienna from

1 to 3 September 2010 respectively. The Commission may wish to take into account, in its discussions under relevant agenda items, the views expressed by the Committee. The Commission may wish to take note of the report.

Documentation

Report of the Secretary-General on the work of the Committee for the Coordination of Statistical Activities (E/CN.3/2011/29)

(j) Inventory of global statistical standards

The Commission will have before it a progress report by the Committee for the Coordination of Statistical Activities on its work to create an inventory of global statistical standards, based on the model that had been created by the National Institute of Statistics and Geography of Mexico. The Commission may wish to take note of the report.

Documentation

Note by the Secretary-General transmitting the report of the Committee for the Coordination of Statistical Activities on the inventory of global statistical standards (E/CN.3/2011/30)

(k) Common open standards for the exchange and sharing of data and metadata

The Commission will have before it the progress report of the Task Force to Establish Standards on Data and Metadata Exchange summarizing recent developments and planned activities concerning this initiative. The Commission may wish to take note of the report.

Documentation

Note by the Secretary-General transmitting the report of the Task Force to Establish Standards on Data and Metadata Exchange (E/CN.3/2011/31)

(l) Follow-up to Economic and Social Council policy decisions

This item was placed on the agenda by the Commission at the request of the Economic and Social Council in its resolution 1999/51 with a view to encouraging a closer relationship between the work of the Commission and the Council. The Commission will have before it a note by the Secretary-General containing extracts from resolutions, decisions and agreed conclusions of the General Assembly, the Council or of other functional commissions that are relevant to the work of the Statistical Commission. The report also contains a description of the actions taken so far and those suggested to be taken. The Commission may wish to take note of the report.

Documentation

Note by the Secretary-General on policy decisions of the Economic and Social Council that are relevant to the work of the Statistical Commission (E/CN.3/2011/32)

(m) National quality assurance frameworks

The Commission will have before it the report of the Secretary-General on national quality assurance frameworks. The report summarizes the activities and discussions carried out by the United Nations Expert Group on National Quality Assurance Frameworks in response to recommendations made by the Statistical Commission at its forty-first session. The Expert Group conducted its first round of electronic discussions on country needs and priorities vis-à-vis the development and implementation of a national framework, and opinions on the proposals for a generic national quality assurance framework template that had been introduced at the forty-first session. The report also provides an update on the establishment by the Statistics Division of a designated website to facilitate the Expert Group's work and to contain a comprehensive inventory of countries' and international organizations' quality work. The Commission may wish to take note of the report.

Documentation

Report of the Secretary-General on national quality assurance frameworks (E/CN.3/2011/33)

(n) Global geospatial information management

The Commission will have before it the report of the Secretary-General on global geospatial information management. The report provides an update on recent activities, outlines the findings of the Second Preparatory Meeting, held in New York in May 2010, and briefs the Commission on the decision of the Economic and Social Council to include the issue of global geospatial information management in its agenda for 2011, to be considered on the basis of a report, which is currently being prepared and which contains a mission statement and terms of reference for the proposed Committee on Global Geospatial Information Management. Furthermore, the report informs the Commission about the planned activities for 2011, in particular the United Nations Forum on Global Geospatial Information Management to be held in Seoul in October 2011. The Commission may wish to take note of the report.

Documentation

Report of the Secretary-General on global geospatial information management (E/CN.3/2011/34)

(o) Measurement of economic performance and social progress

The Commission will have before it a report prepared by the Institut national de la statistique et des études économiques (France) on the measurement of economic performance and social progress, which presents the principal initiatives taken by France over the past year, in an effort to implement the recommendations of the Commission on the Measurement of Economic Performance and Social Progress. It describes both the main statistical projects undertaken and the publications produced, as well as the implications at the international level. The Commission may wish to take note of the report.

Documentation

Note by the Secretary-General transmitting the report of the Institut national de la statistique et des études économiques (France) on the measurement of economic performance and social progress (E/CN.3/2011/35)

5. Programme questions (United Nations Statistics Division)

The Commission will receive an oral report from the Director of the Statistics Division concerning current activities, plans and priorities.

6. Provisional agenda and dates for the forty-third session of the Commission

In accordance with rule 9 of the rules of procedure, the Commission will have before it the draft provisional agenda for its forty-third session, together with an indication of the documents to be submitted under each item and the legislative authority for their preparation. The Commission will also have before it a proposal for the dates of the session. In addition, in accordance with a request of the Council (see Council resolution 1999/51), the Commission will have before it a draft multi-year programme of work for 2011-2014. The Commission is invited to approve the date, provisional agenda and documentation for its forty-third session, as well as to approve the multi-year programme.

Documentation

Note by the Secretariat containing the draft provisional agenda for the forty-third session of the Commission (E/CN.3/2011/L.2)

Note by the Secretariat on the draft multi-year programme of work of the Statistical Commission, 2011-2014 (E/CN.3/2011/36)

7. Report of the Commission on its forty-second session

The Commission may wish to adopt the report on its forty-second session, which will be submitted to the Council.

Statistical Commission
Forty-second session
22-25 February 2011
Item 3 (a) of the provisional agenda*
Items for discussion and decision: World Statistics Day

World Statistics Day

Report of the Secretary-General

Summary

The present report was prepared at the request of the Statistical Commission at its forty-first session (see E/2010/24, chap. I.A.). The report presents an overview of activities undertaken by the statistical community worldwide to mark the first World Statistics Day, held on 20 October 2010, and to celebrate the many achievements of official statistics and the core values of service, integrity and professionalism. The Commission is invited to comment on the relevance and effectiveness of the activities and the proposed options for future celebration of World Statistics Day.

Points for discussion by the Commission are contained in paragraph 44.

* E/CN.3/2011/1.

Please recycle

I. Background to World Statistics Day

1. At its forty-first session, the United Nations Statistical Commission, in its decision 41/109,[1] endorsed 20 October 2010 as the date for the first World Statistics Day, as well as the general theme of "Celebrating the many achievements of official statistics" and the core values of service, integrity and professionalism, while recognizing that each country might develop its own national theme, taking into account national priorities and circumstances. The Commission urged all Member States to observe World Statistics Day and to organize related activities not only in cooperation with all institutes of the national statistical systems, but also with researchers, academia, media and other users of statistics.

2. The Commission requested the Secretary-General to communicate with all heads of Government, conveying a message regarding the importance of official statistics, emphasizing the need for national Governments to provide sufficient support to the national statistical systems and requesting Member States to observe World Statistics Day.

3. The Commission requested the United Nations Statistics Division to prepare a repository and resource kit on World Statistics Day celebrations and activities, to make it available on a designated website and to report back to the Commission at its forty-second session on the experiences related to World Statistics Day 2010 in order to discuss the periodicity of the event.

4. The General Assembly, recalling the long history of official statistics and the facilitating role played by the United Nations, acknowledging the fundamental importance of sustaining national statistical capacity and recalling the adoption of the Fundamental Principles of Official Statistics,[2] decided, in its resolution 64/267, to designate 20 October 2010 as World Statistics Day. Member States, organizations of the United Nations system and other regional and international organizations were invited to observe World Statistics Day in an appropriate manner.

5. On 14 July 2010, the Secretary-General wrote to heads of State or Government, encouraging Member States to celebrate World Statistics Day by acknowledging and celebrating the role of statistics in social and economic development.

6. The Director of the United Nations Statistics Division contacted United Nations resident coordinators, encouraging United Nations country teams to support the national statistical authorities in their country in organizing and publicizing public events on the occasion of World Statistics Day. The Director also regularly updated national statistical offices on the preparations for World Statistics Day and invited them to provide information on their planned activities.

[2] Ibid., *1994, Supplement No. 9* (E/1994/29), para. 59.

II. Activities held in celebration of the first World Statistics Day

A. Website and other promotional tools

7. As requested by the Statistical Commission, the United Nations Statistics Division developed a website to collect and promote all national, regional and international activities related to the Day (http://unstats.un.org/unsd/wsd). The website included the following:

- Information on activities undertaken by countries and areas, international organizations, universities and non-governmental organizations
- Display of posters, flyers, documents and videos produced worldwide, and messages by the Secretary-General, the Under-Secretary-General of the Department of Economic and Social Affairs and the Director of the Statistics Division
- Short articles featuring newsworthy and innovative activities
- A special box and web pages to facilitate downloads of press kit materials, videos, logos, banners and posters

8. The essential purpose of the website was to offer an opportunity to national statistical offices, international organizations and other actors to view the quantity and quality of activities organized to celebrate World Statistics Day worldwide. The website was instrumental in informing all those interested in organizing events and involving senior officials. Even after the official Day, the website remains a useful repository, documenting the various events and materials developed.

9. In addition, the Department of Public Information of the Secretariat developed home pages in the six official United Nations languages (http://www.un.org/es/events/statisticsday), facilitating access to the official website maintained by the United Nations Statistics Division.

10. More than 50,000 people visited the official website in October 2010, with a peak of 22,000 on 20 October alone, the result of the large number of national statistical offices, international organizations and media that provided direct links to the official website.

11. The communications campaign for the Day used YouTube (on which various promotional videos were posted), Facebook and Twitter. The Facebook account drew nearly 4,000 followers, many stating how proud they were to be statisticians and how glad they were that their work would be recognized through the dedication of an international day to them. Many users posted links to articles regarding the Day or on activities to celebrate the Day, such as posters drawn by high school students.

12. A logo for the Day was developed with the assistance of the Department of Public Information. This logo (available in all United Nations languages) was used and adapted by national statistical offices and associations for a wide range of promotional materials or banners, and translated into many non-United Nations languages including Farsi, Portuguese and Turkish.

13. A poster showcasing the logo in six languages was developed by the United Nations Statistics Division. Nearly 6,000 copies of this poster were distributed well

in advance to national and regional statistical offices, United Nations agencies, resident coordinators and information centres worldwide.

14. Some 60 national statistical offices and 10 international organizations developed and printed their own posters and banners, usually including the original logo. The diversity and creativity of posters developed worldwide may be appreciated by viewing those displayed on a flashing carousel on the official website's home page and on a poster repository web page. Other national statistical offices simply reprinted the United Nations posters themselves.

15. Many videos were developed in the framework of World Statistics Day to promote statistical work and censuses among various audiences. In most cases, these products will remain usable in the future to explain official statistics to the public and build public support for statistical work. The World Statistics Day website includes videos developed in various countries and by international organizations. These are also available on YouTube's World Statistics Day channel (http://www.youtube.com/user/UNStatistics).

16. National statistical offices in 80 countries either issued press releases and/or had proactive relations with the press which generated media coverage on World Statistics Day. As requested by the Statistical Commission, the United Nations Statistics Division developed a press kit that was downloadable from the official website. It included a general press release on the Day, a compilation of events organized worldwide and special messages by senior United Nations officials, including the Secretary-General. The press kit was made available electronically to all United Nations information centres and was used in hard copies at United Nations Headquarters and at the Shanghai World Expo.

17. The United Nations information machinery was fully harnessed in support of World Statistics Day and undertook the following activities:

- Production and dissemination of a five-minute video, "Honouring Statisticians Globally"
- Webcast of a press conference held on World Statistics Day at United Nations Headquarters
- Dissemination of an audio-visual package on this press event to TV networks worldwide through UNifeed
- Reports on World Statistics Day by United Nations Radio in all United Nations languages plus Portuguese (UN Radio programmes are regularly broadcast by some 600 radio stations worldwide)
- Articles published on the United Nations News Centre website (and reposted by many websites worldwide)
- Dissemination of press materials through the website for official United Nations press releases and the network of 63 United Nations information centres

18. United Nations Information Centre Lima translated into Spanish the general press release on the Day which was disseminated to other information centres in Latin America. The Centre also arranged interviews for a visiting official of the United Nations Statistics Division taking part in Lima's World Statistics Day event.

19. United Nations Information Centre Tokyo organized a United Nations stand at a popular national statistical fair and presented the video "Honouring Statisticians Globally" to the public with a Japanese translation of its script.

B. National activities

20. Activities to celebrate World Statistics Day were organized by statistical offices, associations and universities in at least 130 countries and areas (see annex I). These activities took the form of public events such as conferences, seminars or round tables, often with the participation of ministers and other senior Government officials. Press briefings were held in many countries to present statistical work to a wide public, in many cases in conjunction with the release of new statistics or information related to a census just held or being held. Radio and TV interviews and quizzes were also held. National statistical offices in some 80 countries promoted the Day, generating significant media coverage worldwide.

21. Information materials were distributed in schools to promote an upcoming census in one country. Commemorative stamps were issued and exhibits displayed in a number of countries. Some 60 national statistical offices produced promotional materials, such as special web pages, posters and flyers.

22. Special messages honouring statisticians were also issued by prime ministers or heads of State or Government. Ministers or other senior officials took part in public events or released messages to celebrate the Day. Numerous conferences, round tables and ceremonies were held in countries worldwide.

23. World Statistics Day was used in a large number of countries and areas as an opportunity to announce a census (through public meetings, round tables, press briefings, or with promotional materials in schools or poster competitions) or report on the results of recent surveys or censuses and to release new statistics of interest to the general public as a way to draw media attention.

24. In addition to those events organized by national statistical offices, a number of activities were organized by universities and various local or regional associations.

C. Activities of international/regional organizations

25. Some 40 international and regional entities (see annex II) observed World Statistics Day, often organizing joint conferences or round tables. In Geneva, a conference entitled "Measuring a Globalized World: Geneva Contribution" was convened jointly by nine United Nations agencies. In Vienna, three United Nations agencies organized a joint seminar and an exhibit. In Washington, D.C., the International Monetary Fund and the World Bank held a joint series of thematic meetings.

26. One way to draw public attention to the usefulness of official statistics was to launch new statistical materials in the context of World Statistics Day. International and regional organizations drew attention to the Day by launching reports illustrating the contribution of official statistics to the progress of societies.

27. *The World's Women 2010: Trends and Statistics*,[3] a five-yearly report on the situation of women produced by the United Nations Statistics Division, was launched at United Nations Headquarters in New York, at the World EXPO in Shanghai in the presence of the Under-Secretary-General of the Department of Economic and Social Affairs (at a joint United Nations-China ceremony to mark the Day) and at the headquarters of the Economic and Social Commission for Asia and the Pacific in Bangkok.

28. The International Telecommunications Union (ITU) launched its latest statistical report, *The World in 2010: ICT facts and figures*, in conjunction with the Day. This report also generated massive media coverage mentioning World Statistics Day, including in numerous technology-related media and websites. The International Labour Organization and the United Nations Conference on Trade and Development launched new specialized databases on 20 October.

29. To celebrate the Day, Eurostat, the Statistical Office of the European Union, released a new publication, *The EU in the world: A statistical portrait*, and issued a press release jointly with each national statistical office of its 27 member States.

30. The Caribbean Community mobilized its member States and associate members to hold programmes of events bridging Caribbean Statistical Day (15 October) and World Statistics Day, including through statistical quizzes, slogans and jingle competitions in schools.

31. Other organizations held special events to celebrate the Day and/or issued press releases, including the Economic Commission for Latin America and the Caribbean (Santiago), the Economic and Social Commission for Western Asia (Beirut), the European Central Bank (Frankfurt, Germany), the International Civil Aviation Organization (Montreal, Canada), the Organization for Economic Cooperation and Development (Paris), UNICEF (New York and Barbados), the World Tourism Organization (Madrid), the United Nations Assistance Mission for Iraq and the World Customs Organization (Brussels).

32. Also worth mentioning are conferences held by the Islamic Society of Statistical Sciences and the International Association for Official Statistics, respectively in Lahore, Pakistan and Santiago.

33. In several countries, the United Nations resident coordinators either took part in a national event or were involved in organizing them (for instance in Cuba, Ghana, Mauritius, Niger, Peru, Senegal and the United Arab Emirates).

III. Review of media coverage

34. Given the multitude of international days, there was a risk that the media would ignore or trivialize World Statistics Day. The media's response was, however, overwhelming and positive, emphasizing the importance of statistical work and the need to continue improving it. Never in the past was there so much coverage in the media about the value of statistical work and its role in the society.

35. A large number of articles reported activities at the national or local level (including at universities and regional statistical offices). Other articles reported

[3] United Nations publication, Sales No. E.10.XVII.11.

declarations or statements by national leaders, especially when they involved a head of State or prime minister.

36. A large number of articles and interviews quoted ministers and/or chief statisticians, often calling for national efforts to continue to improve statistics, releasing news related to statistics or to a census, encouraging the public to participate in a census, or announcing new laws governing statistics. There were also commentaries in the media about achievements, gaps or controversies related to national statistics or censuses.

37. The launches of the United Nations Statistics Division's report *The World's Women 2010* in Bangkok, New York and Shanghai (as a concrete example of the contribution of official statistics to social progress) also generated important media coverage worldwide, especially through key international, regional and national press agencies, by high-profile media like *The New York Times* and *International Herald Tribune*, but also by a large number of media worldwide which focused on statistics of national or regional interest. Their articles usually mentioned World Statistics Day prominently and were published or posted in more than a hundred newspapers and websites worldwide.

38. The ITU report *The World in 2010: ICT facts and figures* also generated important media coverage mentioning World Statistics Day, especially in technology or business sections of mainstream media and in information technology-related websites/publications.

39. The message by the Secretary-General and the various press releases and articles produced by the United Nations and specialized agencies were quoted or reposted on a large number of websites worldwide.

IV. Overall evaluation

40. The celebration of World Statistics Day has succeeded in raising the profile of official statistics in many countries and internationally. This is all the more remarkable as in many countries and international organizations no significant additional resources were made available to organize activities or promote the Day. Many of the activities were the result of the creativity and efforts by statisticians around the world. World Statistics Day quite clearly turned into a motivational event for the statistical community.

41. The increased awareness of the importance of official statistics among policymakers and the general public is expected to have a positive long-term impact for the development of official statistics. Furthermore, there is ample evidence that in many places a dialogue with a variety of user groups was initiated which is likely to continue beyond the Day itself.

42. Based on this successful first experience, future World Statistics Days could be even more ambitious in this particular respect, reaching more systematically beyond the traditional user groups to create connections with specific audiences such as youth and educational institutions. At the international level, the organization of joint events has led to improved cooperation among international agencies active in the field of statistics.

43. Since this unprecedented event has been such a successful opportunity for building support for and better understanding of official statistics among the general public and policymakers worldwide, the Statistical Commission may wish to consider recommending to the Economic and Social Council and the General Assembly the designation of a World Statistics Day in the foreseeable future.

V. Points for discussion

44. **The Commission may wish:**

(a) **To comment on the observance of the World Statistics Day;**

(b) **To consider making World Statistics Day a regular celebration to be observed by national, subregional, regional and international statistical offices;**

(c) **To consider the possible time interval for the celebrations, for example every five years (those ending with a 5 or a 0);**

(d) **To propose appropriate mechanisms to organize the next World Statistics Day.**

Annex I

Countries and areas that celebrated World Statistics Day[a]

Afghanistan

Aland Islands

Algeria

Andorra

Anguilla

Argentina

Armenia

Australia

Austria

Azerbaijan

Bahamas

Barbados

Bangladesh

Belarus

Belgium

Bermuda

Bhutan

Bolivia (Plurinational State of)

Botswana

Brazil

Bulgaria

Burkina Faso

Cambodia

Cameroon

Canada

Chad

Chile

China

Colombia

[a] The list of countries and areas is based on information available to the United Nations Statistics Division as of 11 November 2010.

Costa Rica

Croatia

Cuba

Curaçao

Cyprus

Czech Republic

Democratic People's Republic of Korea

Democratic Republic of the Congo

Dominican Republic

Dominica

Ecuador

Egypt

Estonia

Ethiopia

Fiji

Finland

France

Gabon

Gambia

Germany

Georgia

Ghana
